

# **Enersense and Boliden have signed an agreement on a development project advancing the sustainability of a production plant in Norway**

Enersense International Plc  
Press release 24 January 2023 at 12:00 p.m.

Enersense International Plc, a provider of zero-emission energy solutions, and Boliden, a Swedish metals company, have signed an agreement in a large development project at the Odda production plant in Norway.

In the project, which aims for increasing sustainability and the production capacity of the plant, Enersense Works Oy, which operates in the business area of Smart Industry, is responsible for the supply and installation of steel, equipment installations and insulation work in one of the project areas. The project will start in early 2023.

“The Odda facility is becoming the sector’s most environmentally sound facility in the world when completed, and it is great to be enabling such green development. For Enersense Works this is a project of significant size, and we will continue to strive to be involved in similar projects in Finland and on the international market. The cooperation agreement is also a good indication of the synergies that Enersense Offshore Oy and Enersense Works Oy are able to offer,” says Mikko Lampinen, Chief Operating Officer of Enersense Works Oy.
