

## **Enersense's associated company P2X agrees to deliver green hydrogen to Danisco Sweeteners**

Enersense International Plc  
Press release, 2 November 2023 at 12:30 p.m.

P2X Solutions has agreed to deliver green hydrogen to Danisco Sweeteners, part of International Flavors & Fragrances Inc. (IFF). Green hydrogen will be used at Danisco's plant in Kotka in xylitol production in which xylose and hydrogen are always required, among others. Danisco produces xylitol at its Kotka plant under the brand name XIVIA.

Green hydrogen production by using renewable energy will start at P2X Solutions' plant in Harjavalta during 2024. The process will not release any emissions into the air as does the production of regular hydrogen using natural gas, for example. Work under the equipment and pipeline contract signed by Enersense with P2X last summer started in July 2023. In addition to the equipment and pipeline installation, Enersense will deliver some 70,000 kg of steel structures to the production plant.

Enersense holds 18.5 per cent of P2X Solutions.
